

IILM UNIVERSITY, GREATER NOIDA

INTERNSHIP REPORT PRESENTATION

AWS Gen AI

Virtual Internship

AICTE – EduSkills Virtual Internship Program | Curriculum Provided by AWS Academy

Ayushi Singh

Roll No. 2410030704 | B.Tech CSE

April – June 2026

**Ayushi
Singh**

B.Tech – Computer Science &
Engineering

ABOUT THE STUDENT

Candidate Profile

ROLL NUMBER

2410030704

INSTITUTE

IILM University, Greater Noida, U.P.

PROGRAMME

B.Tech CSE, Batch 2024–2028

INTERNSHIP DOMAIN

AWS Gen AI

DURATION

8 Weeks | April – June 2026

ABOUT THE PROGRAM

EduSkills, AICTE & AWS Academy

EduSkills Academy is an ISO 9001:2015 and ISO/IEC 20000-1:2018 certified organization working under the theme “Nation Building Through Skills.” It partners with the All India Council for Technical Education (AICTE) to run the AICTE–EduSkills Virtual Internship Program under the patronage of the AICTE National Internship Portal. For the AWS Gen AI track, EduSkills collaborates with AWS Academy to deliver an industry- aligned, week- wise curriculum covering machine learning, computer vision, NLP, and Generative AI foundations.

ISO Certified

ISO 9001:2015 & ISO/IEC 20000-1:2018
certified organization.

AICTE Patronage

Run under the AICTE National Internship
Portal.

AWS Academy

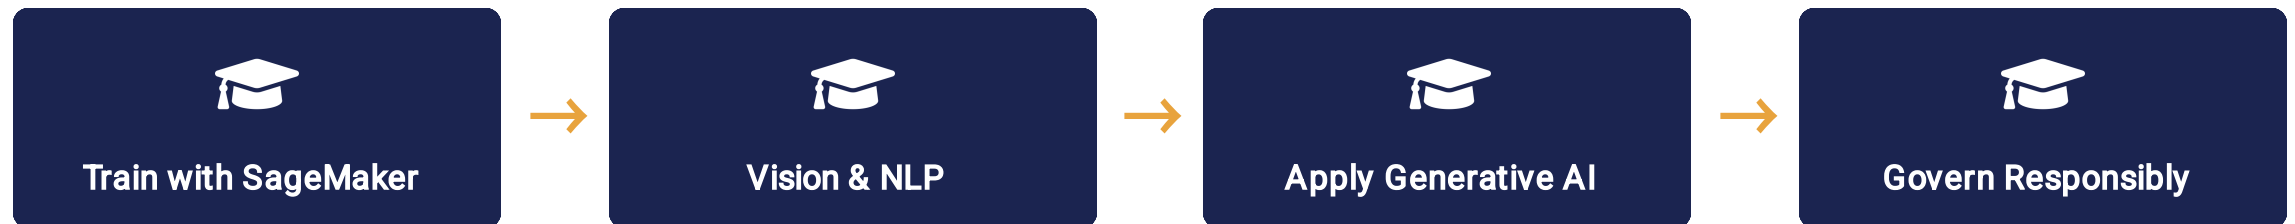

Industry curriculum delivered via AWS
Academy.

PROBLEM STATEMENT

Bridging Theory and Applied Cloud AI

Although many engineering students learn the theoretical foundations of machine learning during coursework, very few get structured, hands-on exposure to building and training models on an industry-standard cloud platform such as Amazon Web Services. Concepts such as managed forecasting, computer vision, NLP, and Generative AI are often understood only theoretically – with little practice using cloud-based tools or applying prompt engineering and responsible-AI principles.

This internship addressed that gap – practically learning the full AWS-based ML & Gen AI workflow:

What the Internship Set Out to Achieve

ML with SageMaker

Solve ML problems and train models using Amazon SageMaker and XGBoost.

Computer Vision

Explore computer vision for image and video analysis, and forecasting with managed services.

NLP Fundamentals

Learn text processing, sentiment analysis, information extraction, and topic modeling.

Generative AI

Explore prompts, prompt engineering, and foundation models with AWS Academy.

Responsible AI

Understand security, governance, and compliance for using Generative AI responsibly.

Final Assessment

Clear the Final Assessment Test and Internship Grade Point Assessment.

The Toolkit Behind the Internship

Amazon SageMaker

ML problem-solving & training

XGBoost

Data splitting & model training

Amazon CodeWhisperer

AI-assisted development

AWS Documentation

Reference & best practices

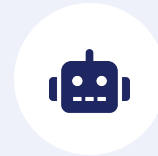

Computer Vision

Image & video analysis

NLP Toolset

Sentiment & topic modeling

Generative AI

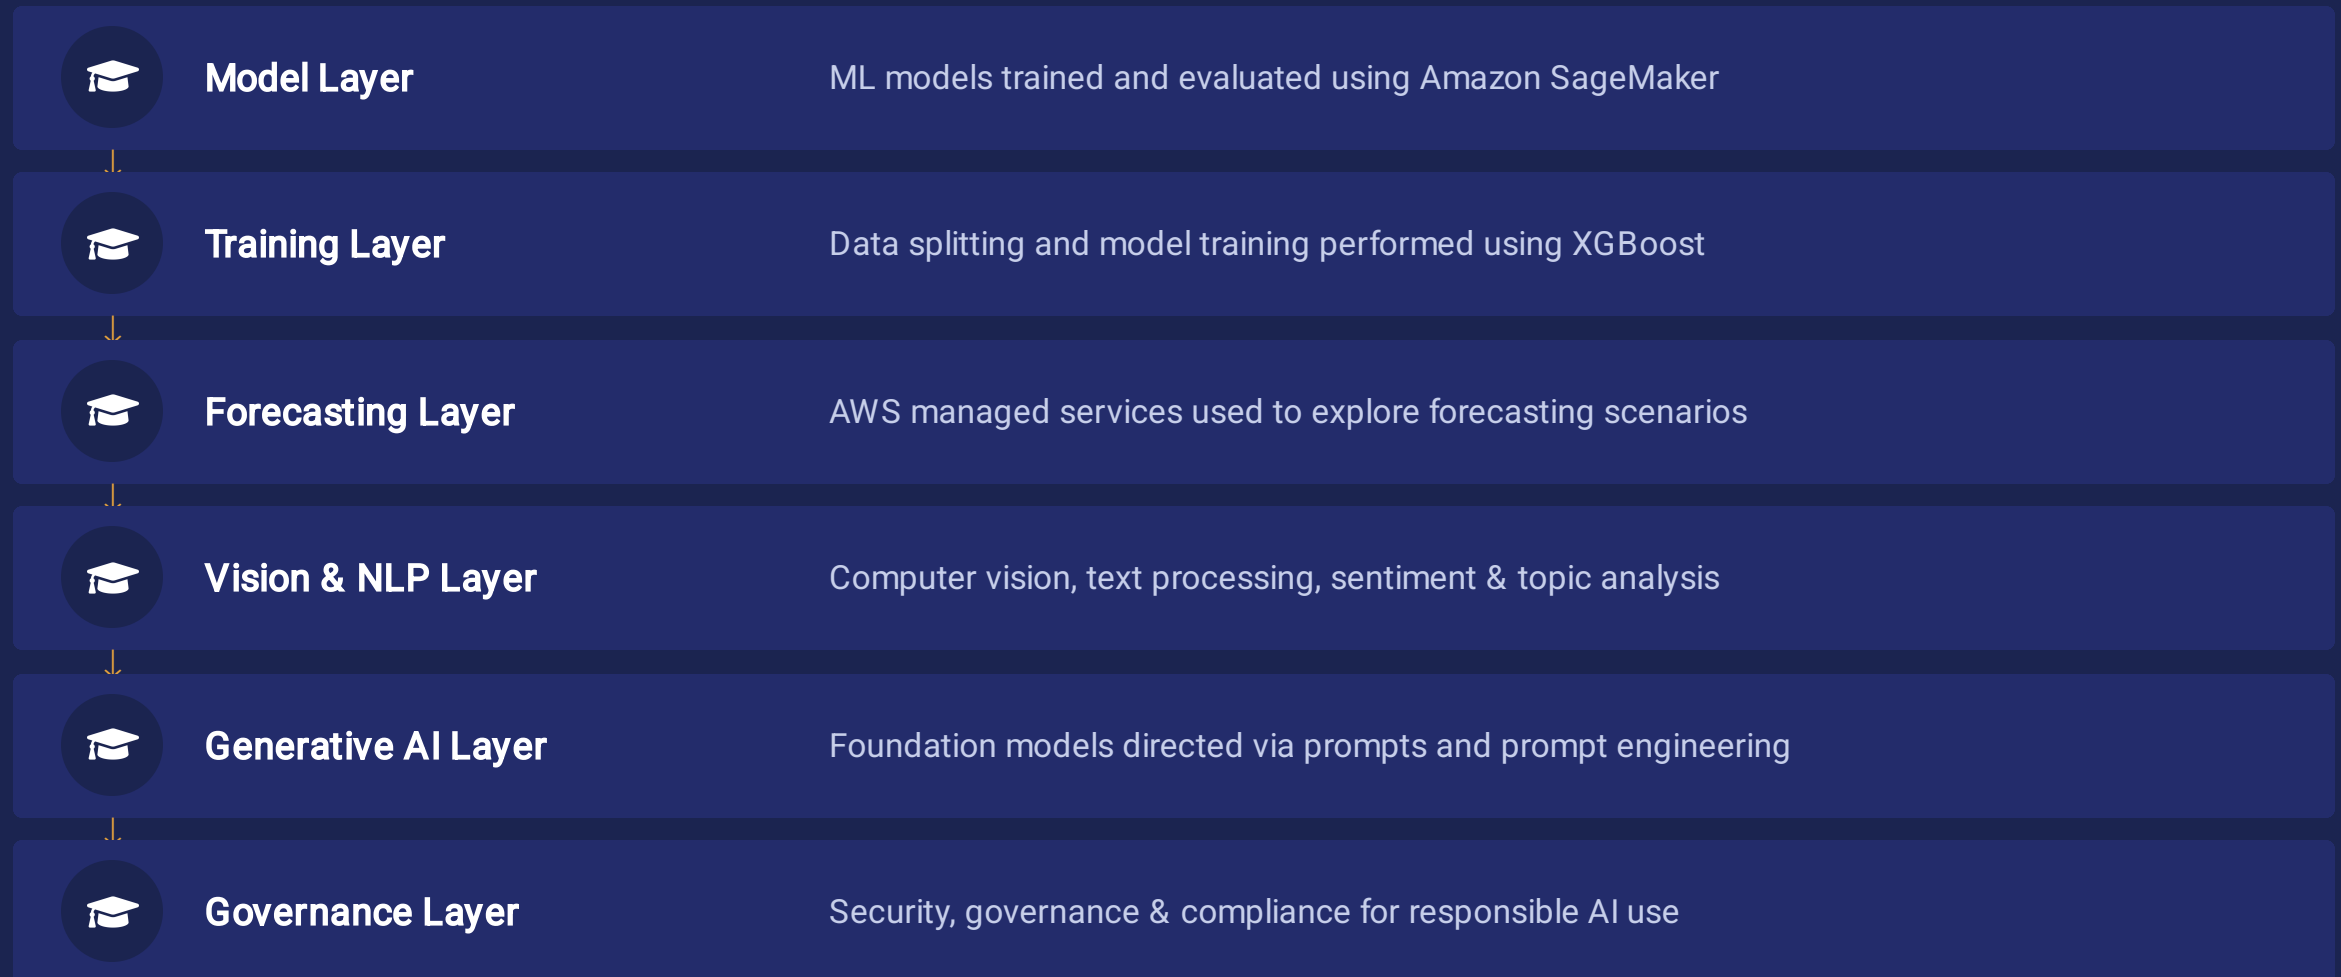

Prompts & foundation models

Governance & Compliance

Responsible AI practices

From Cloud Training to Responsible AI

The 8-Week Learning Journey

1 WEEK

ML Foundation I

SageMaker demos, data splitting, training with XGBoost

2 WEEK

ML Foundation II

Forecasting, computer vision overview, NLP overview

3 WEEK

ML Foundation III

Generative AI, Amazon CodeWhisperer, AWS documentation

4 WEEK

NLP Fundamentals

AWS Academy NLP, text processing techniques

5 WEEK

NLP Applications

Sentiment analysis, information extraction, topic modeling

6 WEEK

NLP Wrap-up

Working with languages, generative AI solutions

7 WEEK

Gen AI Foundations I

AI fundamentals, prompts, prompt engineering, Foundation Model

8 WEEK

Gen AI Foundations II

Responsible AI, security, governance & compliance

Skills & Capabilities Gained

-  Ability to solve ML problems and train models using Amazon SageMaker and XGBoost
-  Working understanding of forecasting with AWS managed services and computer vision overview
-  Practical exposure to NLP — text processing, sentiment analysis, information extraction & topic modeling
-  Understanding of Generative AI foundations, including prompts, prompt engineering & foundation models
-  Awareness of security, governance & compliance for using Generative AI responsibly
-  Cleared the Final Assessment Test and Internship Grade Point Assessment with an “Outstanding” grade

CERTIFICATION

Successfully Completed

GRADE

O – Outstanding

CERTIFICATE ID

4fb8887c10a0ef165878

STUDENT ID

STU69e63c9a3e7a01776696474

DURATION

8 Weeks | April – June 2026
